

I support the call to give families total health care portability so that a mother or father can take his or her insurance to and from any job. I also support the "American Competitiveness Initiative" to hire 100,000 new math and science teachers for our public schools to strengthen America's competitiveness. Public schools in the 10th District will welcome those new teachers. The President has proposed...now it's Congress' time to lead. In the coming days, I will work with Democrats and Republicans on new legislation to root gangs out of schools, make health insurance more affordable and lessen the mercury pollution of Lake Michigan.
